

**Terms and conditions for participants in the public consultation are as follows:**

FGW offers a public consultation of its draft technical guidelines of the Expert Committee for Electrical Characteristics (CEC) to all interested parties. Interested parties can therefore register to comment on these drafts of TG 3, TG 4 and TG 8 in English or German language and join in the discussion on these proposed changes.

Interested participants must register with FGW using the FGW shop prior to the completion of the commentary phase and must acknowledge both the [General](#) and the [Extended Rules of Procedure of the Expert Committee for Electrical Characteristics](#) (CEC), the [FGW compliance guidelines](#) as well as the instructions on commenting which are stated within the [comment templates for TG 3, TG 4](#) and TG 8. Participants taking part in the consultation of TG 8 need to acknowledge the Extended Rules of Procedure for TG8. These acknowledgements also include, in particular, acknowledgement of the full assignment of exploitation rights relating to all content incorporated into the guidelines (see [General Rules of Procedure](#)).

By paying the registration fee, participants acquire

- the requested draft
- the right to submit comments on this draft in electronic form
- the right to participate in the consultation meetings that will be used to address the comments submitted
- and the Technical Guideline itself, published following the conclusion of the revision cycle

After registering, participants can comment on the draft document using a comment template that is provided. The consultation periods for the latest possible submission of comments can be found in the comment template themselves, and have been planned for the following periods:

TG 3: 17 May – 29 June 2018

TG 4: 17 May – 29 June 2018

TG 8: 6 June – 3 July 2018

Please observe the notes in the comment template and submit your comments until the relevant deadline, indicating your order number (Bestellnummer) to [publicconsultation@wind-fgw.de](mailto:publicconsultation@wind-fgw.de).
